BUG BOMB

FUEL BIOCIDES

Your fuel is vulnerable to water contamination during transport and storage. And, once you have water in the system, you are set for an invasion of microorganisms (bacteria, yeast, and mold). Microbes attack at the fuel/water interface, where they thrive and multiply. Once established, they entrench themselves in a thick layer of slimy deposits and create a number of problems. Microbes also grow as bio-films on tank walls, on internal pipe surfaces, and in filter housings. Left unchecked, microbial assault in these areas leads to accelerated pitting corrosion. And, that leads to costly repairs. If all of this isn't bad enough, the problem is compounded by the normal distribution process. As fuel is moved from one tank to the next, microbes move too... and contamination spreads like a disease.

Why Use ET Bug Bomb Biocide?

When it comes to fighting microbial growth in fuel, ET Bug Bomb 'Dual Phase' Biocide is the ultimate weapon. Used at the outset, it will keep your fuel free of biological contamination. It is also a superior curative agent for contaminated fuel. ET Bug Bomb offers a wide variety of advantages that no other fuel biocide can match.

USER BENEFITS

- Easy to use solid, non-dusting cylinder with dissolvable wrapper limits exposure to user
- Totally water-soluble, non-foaming
- Registered with the Environmental Protection Agency in the United States
- Fully compatible with diesel fuel and diesel fuel additives
- Proven performance: has been shown to be effective time and time again in demanding applications worldwide
- Provides protection from bacteria, yeast, and mold
- Cost-effective in terms of effectiveness, stability, compatibility, and biodegradability
- Kills completely in as little as 8 to 24 hours
- Dual phase product kills bacteria in the fuel AND water layers

The ET Bug Bomb is the most cost-effective fuel biocide on the market

TREATMENT RATIO

1-2500	KILL RATIO <i>Use 1 stick to 2500 gallons of diesel fuel to clear Sulfate-Reducing and Slime-Forming Bacteria as well as yeasts and molds.</i>
--------	--

Dual Phase activity means bacteria in all phases of your fuel are treated. Consult product label for specific safety, environmental and application information.

Container Size – 10 Sticks per Box
